READING PROGRAMS AT EVANSTON TOWNSHIP HIGH SCHOOL

Report to the Board of Education District 202

Regina Armour, Literacy Coordinator

Judith Levinson, Director of Research, Evaluation & Assessment

October 26, 2009

Part I: Overview

Course Grades

Appendix B provides the percentage of D/F/NC grades from 2005-06 through 2008-09 for READ 180, Freshman Reading, and 2 Humanities Enriched.

- In English:
 - o The percentage of D/F/NC's increased from 2007-08 to 2008-09 for READ 180, Freshman Reading and 2 Humanities Enriched.

0

Based on feedback from Jimi Cannon, our literacy consultant, we revised a series of questions from prior surveys to collect more focused feedback (Appendix C, Part 3). About 50% or more of students indicated they were using the following strategies:

- Finding the main idea
- Re-reading a passage to make sense of difficult text
- Adjusting their reading pace
- Using pictures, illustrations, and graphs
- Using headings and subheadings in textbooks
- Using the author's clues to make inferences
- Asking themselves questions to help stay involved and check their understanding
- Setting a purpose before reading

The responses to the remaining items suggest that the majority of students have not yet learned to self-monitor in these areas:

- Using connections in their lives to help them understand
- Thinking about what they already know to help them understand
- Monitoring themselves for words they do not understand
- Checking for both clues and word parts they know
- Taking notes or highlighting important information and then writing a brief summary

Part IV: Looking forward to 2009-2010 – An Action Summary

All of the student data collected was shared with the teachers and department chairs in a meeting over the summer and in a follow-up this fall. These data are driving the specific changes in our program already made for this year; these data are also being used to focus our professional development work and program development with Jimi Cannon. This information has the following implications:

- Reading instruction should be more directly connected to the classroom instruction in English and History. For example, pre-teaching of the reading content might help to improve course grades and reduce the large percentage of D/F grades.
- We are making progress on student strategy use. This year we should focus more on the five strategies that the data indicated the majority of students reported not utilizing.
- The data provide confirmation that students have difficulty reading science material and that our literacy efforts in the science department are important to continue.
- We need to continue to find opportunities for students to read in school and to encourage reading outside of school. Students indicate they like to read and have reading materials at home. It may be that students do not put time aside to read.

From what we have learned from the data, national research and teacher experiences, we are already implementing the following:

- A new Scholastic program called *System 44* (named for the 44 sounds in the alphabet) that address the small percentage of students who need explicit instruction in phonics and basic word identification
- More intensive coaching support to the reading program teachers by the literacy coordinator and by Jimi Cannon on strategies and methods for one-on-one student interventions
- A newly revised Freshman Reading curriculum to more closely support students in being successful in 1 Humanities

More explicit instruction that does not just teach students reading comprehension skills and build vocabulary, but also pushes them to identify themselves as *readers*. (Teachers and coaches will explicitly model what good readers and writers do.)

More reading time in all reading classes to further develop the independent reader by having students wrestle with challenging questions while teachers monitor student comprehension

Over the course of this year, we will be taking the following actions:

What	Who Develops	Who Uses	Completion Timeline
Refine classroom observational rubric with explicit literacy markers to identify good instruction or gaps in instruction	Literacy Coordinator with input from School Administrators, Coaches, Chairs, Reading Teachers, J. Cannon	School Administrators, Chairs, Coaches, Literacy Coordinator, J. Cannon	Fall 2009
Select and develop monitoring tools that provide more frequent, more discrete measures of students' reading growth (e.g., formative assessments, individual reading inventories, running records)	Literacy Coordinator, Coaches, Reading Teachers, J. Cannon	Literacy Coordinator, Coaches, Reading Teachers	Currently in use
Set short-term targets in addition to annual targets for students in the reading programs	Literacy Coordinator, Coaches, Reading Teachers, J. Cannon	Literacy Coordinator, Coaches, Reading Teachers, J. Cannon	Currently in use

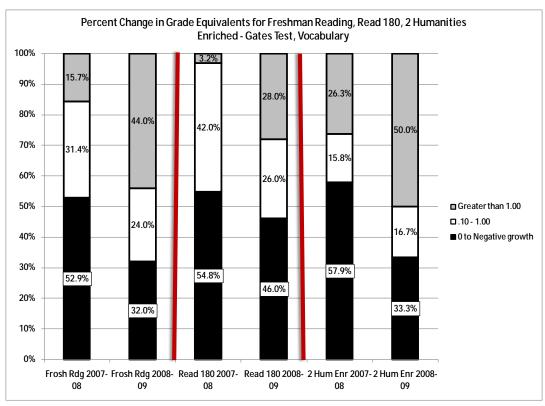

Investigate the **needs of our junior and senior** students and design new support mechanisms for readers who

 $are not yet proficient at those level \ Cann 5 stig 1\ 45239h 20(s) - 3(t 7430.32\ 0.48\ 0.2 - 6(n) - 2(i) - 3(o) - 10(r)] TJo) - 8(nn 5) - 20(s) - 3(t) - 5(iu 42\ 0.20(s) - 3(t) - 10(s)) - 10(s) - 10(s)$

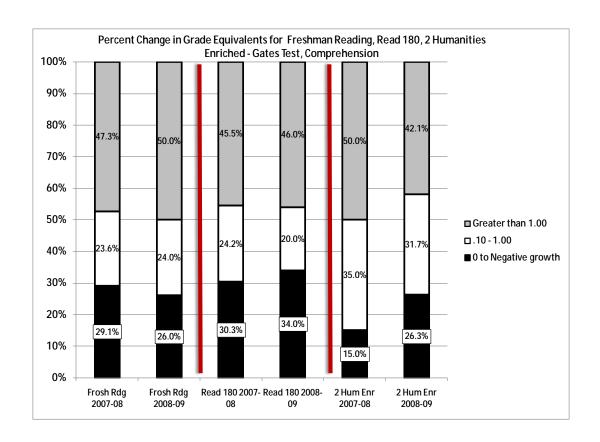

We are currently receiving support, but continued support is needed. We specifically request:

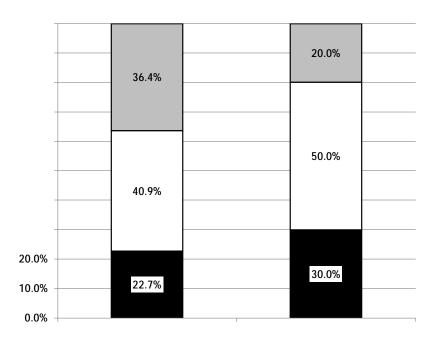

The committed leadership from administration, chairs, coaches and teacher leaders as this is not a quick project

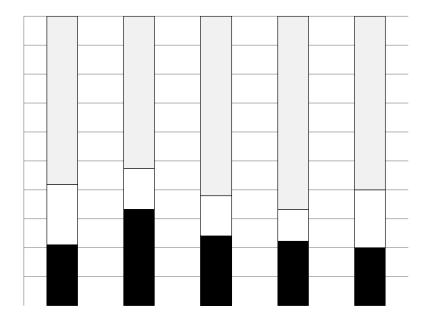

Time and resources for continued, intensive professional development Understanding and patience as we are use this information to address this daunting problem <u>2</u>23 283.44 695.28 m()<u>FC</u>/7
